

Insulation Rebate Program

Program Guidelines

Effective 01/01/2025

Qualifying Criteria

- 1) Rebates are only available to Cimarron's residential electric members.
- 2) To qualify, insulation must be installed in the attic or roof space of a residence, between conditioned and unconditioned spaces. Insulation above non converted garages does not qualify.
- 3) No buildings, garages, apartments, or sheds outside the square footage of the home's footprint will qualify for a rebate.
- 4) Generally, mobile homes do not qualify for these rebates; however, they may be considered on a case-by-case basis if the member so desires.
- 5) Builders of new homes do not qualify.
- 6) Each individual home in a multi-home building with a single roof qualifies for the rebate; however, apartment complexes do not qualify.
- 7) Total finished attic/roof insulation must be equal to or greater than R-49.
- 8) Spray foam insulation will qualify but **only** if installed by a licensed professional installer.

Rebate Details

The rebate amount will be based on the **existing** ceiling insulation R-value and after the additional insulation added creates a total minimum R-value of 49 or greater. If there are varying levels of R-values in the attic (before new insulation is added), an overall average will be used to calculate the rebate.

- 1) Blown, batt, or board insulation may be installed by a qualified contractor, or by the homeowner/property owner.
- 2) Member must provide photos of existing measured insulation and new installed measured insulation for comparison.
- 3) After completion of the installation, a representative from the Cimarron may inspect the premises and note the current insulation type(s) and depth(s).
- 4) To qualify, a complete rebate application must be received by Cimarron within 90 days of the completion of the installation of the insulation. This form can be found on our website at cimarronelectric.com/rebate-form

Rebate Application Details - cimarronelectric.com/rebate-form

- 1) Rebate applications must be submitted to Cimarron and must include the following:
 - a. Rebate Request Form (fully completed and signed),
 - b. A copy of the contractor invoice, materials invoice, receipt, or both,
 - c. Member must provide photos of existing prior insulation and newly installed insulation
- 2) The full amount of the rebate will be issued as a check.

Step-By-Step Process for Members and Cimarron Personnel

- 1) The member views the Rebate Request Form and reviews the Ceiling Rebate Program Guidelines.
- 2) The member gets the extra insulation installed.
- 3) The member fills out the Rebate Request Form, uploads copies of support documentation (as detailed above), and signs the member portion of the form.
